REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach all of the limitations of the claimed invention including:

In claim 23: the confronting pairs of sidewalls of each of said openings defining opposing plates of a capacitor for controlling resonance frequencies of said high impedance surface as a function of location of each capacitor along the high impedance surface.

In claim 34: wherein the confronting sidewalls are formed to depend in a direction away from said openings and towards said additional sheet metal, but being spaced therefrom, so that a gap occurs between each depending sidewall and said additional sheet metal.

In claim 35: - forming a structure from sheet metal, the structure having a plurality of openings therein with confronting sidewalls defining the sides of the openings, the structure also having a plurality of protrusions projecting from a major surface thereof, the confronting sidewalls providing opposing plates of the capacitors; and joining the structure to additional sheet metal such that ends of the protrusions remote

from the major surface are coupled to the additional sheet metal.

Accordingly, claims 23-29 and 34-42 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
